Rowell Patrimonios

La democratización de la banca privada

Customer Area Platform

Concept

Rowell Patrimonios

Concept:

A Platform providing a **Customer Area** with:

- Secure and personal Login
- Basic features:
  - **Repository** to share & store (only if very safe) files: reports, docs, etc.
  - **Dashboards**. Different tabs showing interactive dashboards (PowerBI like). In some cases, the raw data for the Dashboards needs to be uploaded by the customer once a month so an uploading raw data function is required.
- Extras features:
  - Online payments for booking consulting hours and reports.
  - Request Rowell reports and assessments (templates).

Note:

Rowell is already using Microsoft internally so it would be a clear advantage if the Customer Area Platform is built, managed and maintained with Microsoft Power Platform tools (SharePoint, PowerBI, PowerAutomate, OneDrive, etc.). If so, it's key to identify the cost of the MSFT licenses needed:

- for the MVP (2-3 admins + 50-100customers)
- to scale the tool (2-3 admins + >300 customers).

Two modalities:

1. **Investment customers:**
   - ✓ Login on Rowell Patrimonios website
   - ✓ Dashboards:
     - ✓ Investment portfolio monitoring
     - ✓ Global wealth monitoring
     - ✓ Planificacion Financiera a vida
   - ✓ …

2. **Wealth Managers:**
   - ✓ Login on dedicated website
   - ✓ Dashboards (need to upload files ones a month):
     - ✓ AUM KPIs and growth (by manager)
     - ✓ Remuneration – History & Forecast
     - ✓ Portfolio simulation (X-Ray)
     - ✓ Customer analysis
     - ✓ Investment portfolio monitoring (by customer)
   - ✓ …

Dashboards

Sample for Wealth Managers

Rowell Patrimonios

Raw Data from web:

- Registro_Operaciones
- 24.xx.xx_Saldo
- 24.xx.xx_Pos
- 24.03_Saldo
- 24.03_Pos
- 24.02_Saldo
- 24.02_Pos

- ✓ The Wealth Manager needs to upload 3 files once a month to update the dashboards with the instance of the new month.
- ✓ The raw data files format is as shown below.
- ✓ Raw data format needs to be adjusted and new fields to be created for the dashboards
